Film and Media Studies
21st Century Film Essentials

Cinema has a storied history, but its story is far from over. 21st Century Film Essentials offers a lively chronicle of cinema’s second century, examining the landmark films of our ever-changing moment. Each book makes a case for the importance of a particular contemporary film for artistic, historical, or commercial reasons. The twenty-first century has already been a time of tremendous change in filmmaking the world over, from the rise of digital production and the ascent of the multinational blockbuster to increased vitality in independent filmmaking and the emergence of new voices and talents both on screen and off. The films examined here are the ones that embody and exemplify these changes, crystallizing emerging trends or pointing in new directions. At the same time, they are films that are informed by and help refigure the cinematic legacy of the previous century, showing how film’s past is constantly reimagined and rewritten by its present. These are films both familiar and obscure, foreign and domestic; they are new but of lasting value. This series is a study of film history in the making. It is meant to provide a different kind of approach to cinema’s story—one written in the present tense.

Series Editor: Donna Kornhaber
